Quality managed under ISO 22716 (GMP), ISO 9001 and ISO 14001, as declared by the company

As stated by the company, certified or registered across several markets — US MoCRA, EU CPNP, Switzerland PIF and others

ABOUT THE COMPANY

THREE DAYS LOVE CO., LTD. (주식회사 3일애) is a Korean cosmeceutical company that, as stated by the company, has specialised in topical “skin-implant” delivery technology since 2001. Its head office is in Seoul (Songpa-gu) with raw-material processing and R&D facilities in Seongnam, Gyeonggi Province. The company develops and supplies professional skincare under several of its own brand lines — ThreeDaysLove, RETURN 10 and TIME 72 — and also offers OEM/ODM manufacturing under a customer's own brand.

The company's positioning is built around proprietary delivery technologies for which it reports Korean patents: SPICUS® — a plant-collagen-coated bio micro-needle for delivering actives into the skin topically, without injection (patent No. 10-2767202); EXOMERE Halla® — an exosome complex derived from Jeju Hallabong (patent No. 10-2677780); and EXO-AG® — a black-garlic and aloe-vera exosome complex (patent No. 10-2534286). As stated by the company, these technologies are intended to improve the delivery, stability and efficacy of active ingredients. The products are positioned as professional cosmeceuticals, not as medical devices or medicines.

By the company's account, quality is managed under ISO 22716 (cosmetics GMP), ISO 9001 and ISO 14001, and the range is certified or registered across a number of markets — including US MoCRA, EU CPNP and Switzerland PIF. A separate brand line, EXOMERE, appears in the company's own price list; per public data EXOMERE CO., LTD. is a distinct legal entity, and the relationship between the two companies is not independently confirmed — on this showcase the brands are not merged into a single legal entity.

PRODUCT LINES

ThreeDaysLove — flagship cosmeceuticals

The core professional line: recovery balms, ampoules, implant creams and targeted care built on the SPICUS® micro-needle delivery concept. Includes Recovery Balm, the Whimela Shining and Derma series, Phytobiome and scalp care.

RETURN 10 — home MTS and peptide care

A cosmeceutical line around MTS (micro-needle) solutions, peptide creams and ampoules, recovery-balm compacts and mask packs — a home-care companion to professional treatment. RETURN 10, per the company, is NMPA-registered for China.

TIME 72 — recovery and healing

A compact line focused on post-care recovery and soothing: AC Miracle Healer and Miracle Spongliia, and the TIME 72 EXOMERE Time Lock program kit.

EXOMERE / EXOMERE G — exosome line

An exosome-based brand line present in the company's price list: implant solutions, recovery balms, glutathione and ceramide care, mists, body and eye care. Presented as a brand line; per public data EXOMERE CO., LTD. is a separate legal entity, and the link is not independently confirmed.

SPICUS® — patented ingredient technology

The plant-collagen-coated bio micro-needle at the heart of the range; per the company, it delivers actives into the skin topically, without injection, to support regeneration and elasticity.

TECHNOLOGY AND MANUFACTURING

SPICUS® bio micro-needle delivery

A plant-collagen-coated micro-needle (spicule) technology; per the company (patent No. 10-2767202), it delivers active ingredients into the skin topically — a non-injection route — while reducing irritation.

EXOMERE Halla® and EXO-AG® exosomes

Exosome complexes from Jeju Hallabong (patent No. 10-2677780) and from black garlic and aloe vera (patent No. 10-2534286), as reported by the company, used to support skin recovery and firmness.

Quality systems

Manufacturing managed under ISO 22716 (cosmetics GMP), ISO 9001 and ISO 14001, as declared by the company; copies of certificates are requested and verified at the deal stage.

Full-cycle OEM/ODM

Product planning, formulation, packaging and manufacturing under a customer's own brand, with export support. Terms and minimums are confirmed via Teranova.

CERTIFICATIONS AND REGISTRATIONS

Declared by the company. As stated by THREE DAYS LOVE, quality is managed under ISO 22716 (GMP), ISO 9001 and ISO 14001; the range is certified or registered across markets including US MoCRA, EU CPNP and Switzerland PIF, with the RETURN 10 line NMPA-registered for China. The company also reports Korean patents for its SPICUS®, EXOMERE Halla® and EXO-AG® technologies. Copies of documents are requested and verified at the deal stage.

PRODUCT FORMATS

Balms and creams, 15–100 g

Ampoules and MTS solutions, sets and single units

Mists and serums, 45–300 g / ml

Mask packs and cleansers

Program kits and sets

Body and scalp care

EXPORT AND MARKETS

As stated by the company, the range is certified or registered across several markets — including US MoCRA, EU CPNP and Switzerland PIF — and the RETURN 10 line is NMPA-registered for China; the company describes itself as certified in eight countries. The delivery basis is FOB Korea. Final registration status for any specific market is confirmed at the deal stage.

Prices and terms are indicative and are finalized at the deal stage via Teranova. The supplier's direct contacts are not published: Teranova Group handles negotiations, due diligence and delivery support.
