ABEREDE

Vegan derma-cosmetics from Korean land

Korean vegan skincare: the PRINCIPLE line on licorice and hyaluronic acid, the CICALPINE™ line on pine and centella from Jeju, ampoules and targeted care

About the company

ABEREDE is a Korean brand of vegan derma-cosmetics. It is made by Lubedecacorn Global, a Seoul company registered on 10 November 2022.

The brand idea is simple and it is held to: the formulas are built from plant material taken from specific natural areas of Korea — from its land, its sea and its mountains. That is where the CICAPINE™ line comes from, built on pine and centella from the island of Jeju.

In three years the company has gathered what usually takes longer: two patents on formulations against pigmentation, a trademark registration, the status of an approved exporter by origin, and a place in the Global Small Giant 1000+ programme.

The products are carried in the duty free of the Hyundai department store and at Incheon airport, and the brand has shown at Cosmoprof in Bologna and Hong Kong, at KCON LA and at Dubai Beauty World.

Lubedecacorn Global was registered on 10.11.2022; ABEREDE is its vegan derma-cosmetics brand

Two patents on cosmetic formulations against pigmentation and for brightening, both dated 29.08.2023

Approved exporter status by origin of goods and a place in the Global Small Giant 1000+ programme

Three signed irritation test reports: index 0.00, classified as non-irritating

The company states that its products reach 30 countries, among them the United States, Mexico, the CIS, the Middle East, South-East Asia and Indonesia

Duty free at the Hyundai department store and Incheon airport; Cosmoprof Bologna and Hong Kong, KCON LA, Dubai Beauty World

Product lines

PRINCIPLE

The base hydration line in three steps: toner, serum and cream. The toner carries licorice extract and hyaluronic acid, the serum is stated at 30 per cent high-molecular hyaluronic acid, and the cream carries guaiazulene, a peptide complex and ceramides. It is these three products that hold irritation test reports with an index of 0.00.

CICAPINE™

The line for problem skin and enlarged pores, built on the brand's own CICAPINE™ ingredient: phytosterols from green pine and centella from the island of Jeju. The company names a patented FLEX_some™ delivery method and orthosiphon extract for pore care. The line covers a serum, a balancing gel cream and a micellar foam cleanser.

Ampoules

Three 30 ml ampoules for different jobs. NIA 10% with glutathione works on pigmentation by blocking, in the company's description, the movement of melanin from the basal layer to the surface. VOR is built on vorphyrin and five peptides for skin density. HYA with vitamin E covers hydration and antioxidant protection.

Targeted care

Products for one job each: the COLLAGEN 70 peel-off mask with 300 Da low-molecular collagen, glutathione and PDRN; a lifting eye cream on PCL and NMN; an overnight jelly lip mask on NAD and PDRN; a gel against dark spots for face and body; and an SPF50 PA++++ sunscreen.

Formulation, patents and testing

CICAPINE™ — pine and centella from Jeju

The brand's own ingredient. The company names phytosterols obtained from green pine and centella from Jeju, together with a patented FLEX_some™ method which, by its data, helps active ingredients absorb.

Two patents on anti-pigmentation formulations

Both granted on 29 August 2023: a cosmetic composition for improving melasma and hyperpigmentation, and a composition with spot-removal and whitening function.

Clinical reports with an index of 0.00

Human Co., Ltd. Skin Clinical Trial Center, reports dated 27 September 2023 on the PRINCIPLE toner, serum and cream. Patch test, assessed by a dermatologist 30 minutes and 24 hours after patch removal. Irritation index 0.00, classified as non-irritating, with no adverse reactions recorded.

Low-molecular collagen and PDRN

In the COLLAGEN 70 mask the company states 70 per cent ultra-low-molecular collagen at 300 Da, 700 ppm of glutathione and PDRN, along with a patented blend of five fermented ingredients — soybean, rice, adlay, potato and ginseng — made by two-step fermentation.

Vegan formulation and low-impact printing

The brand is declared vegan and not tested on animals. Packaging, by the company's data, is printed with soy inks on FSC-certified paper.

Product catalogue

Vegan derma-cosmetics in four groups: the PRINCIPLE base hydration line, the CICA Pine™ line on pine and centella from Jeju, three ampoules for different jobs, and targeted care from a mask to SPF50. Price on request.

11 g

Export and markets

By the company's data the products reach 30 countries, among them the United States, Mexico, the CIS, the Middle East, South-East Asia and Indonesia. In its letter of 30 August 2026 the company said plainly what it is looking for: the war slowed its Middle East business and the brand is choosing new countries. Teranova works across Latin America and North America — the markets where vegan derma-cosmetics with documents in hand travel most easily.

Patents and testing

Vegan

Cruelty-free

0,00

The 0.00 mark on the PRINCIPLE line is the irritation index from signed reports by Human Co., Ltd. Skin Clinical Trial Center dated 27.09.2023; we hold the copies. The vegan status, the formulation patents and the SPF are declared by the company; documents are provided to a buyer on request.

Toners and serums at 50 and 150 ml

Face creams at 50 and 60 ml

Ampoules at 30 ml

Peel-off masks

Eye creams at 15 ml

Lip masks

Gels against dark spots

Sun care at SPF50 PA++++

Hydrogel cleansing soap

Trial sachet sets at 1.5 g

Terms of cooperation

Forms of cooperation

Wholesale supply of finished products under the ABEREDE brand. The company is open to importers, distributors, retail chains, duty free and online channels.

Geography

The company is looking for new markets to replace a slowed Middle East. The publication authorization is non-exclusive: Teranova is not its agent or distributor.

Prices

Price on request. We hold the company's price list with minimum order quantities, but we do not publish it in the open. Current terms reach the buyer at the deal stage through Teranova, shown separately from the cost of our own services.

Minimum order

A minimum quantity is set per item and counted in cartons. Exact figures are given against a specific list at enquiry stage.

Documents

The PRINCIPLE toner, serum and cream hold signed irritation test reports. The company declares formulation patents and a trademark registration. Copies are provided at the buyer's request.

How the work runs

Enquiry → Teranova checks and agrees the scope → negotiation and samples → logistics, customs and payment handled end to end.

Prices and terms are indicative and are finalised at the deal stage through Teranova. Direct supplier contacts are not published: Teranova Group runs the negotiation, the checks and the delivery.

Interested in this supplier?

Get in touch — Teranova arranges the negotiation, the checks and the whole deal from first contact to delivery.
