KIFT COMPANY

High-performance all-in-one care: fewer steps, more radiance — KIFT, a Korean all-in-one cosmetics brand; manufacturing through certified partners

TERANOVA GROUP

ABOUT THE COMPANY

TERANOVA GROUP

KIFT COMPANY is the owner and developer of KIFT, a Korean brand of high performance all-in-one cosmetics. The brand concept is care that does it all in one: a single product addresses several skin needs and reduces a multi-step routine of 6–10 products to a single step. The company positions itself as the brand owner and formulation developer rather than as an in-house manufacturing plant; finished products are made through certified Korean manufacturing partners.

The lineup is built around four all-in-one formats — a serum, creams, a leave-on bubble care mask and a cleansing bar for face and body. Key products: Multi-Solution Face & Eye Serum, Multi-Solution Miracle Mask Cream, Multi-Solution Air Glow Cream, Super Bubble Mask All-In-One and Multi-Solution Face & Body Soap. The formulas combine several cosmetic actives in a single step — birch sap, fermented filtrates, hyaluronic acid complexes, ceramides and botanical ingredients.

KIFT is known for its crowdfunding launches on the Korean platform Wadiz and is preparing to enter international markets: in September 2026 the company is taking part in K-EXPO MEXICO in Mexico City. The core cooperation format is wholesale supply of the brand's finished products on EXW Suwon terms. Clinical and marketing materials are the company's own data, provided at the deal stage and not reproduced on the site as independently verified. For open markets, including Latin America, materials are published through Teranova.

CAPABILITIES AND MANUFACTURING

Capabilities and manufacturing

TERANOVA GROUP

A focus on all-in-one care

Multifunctional all-in-one formulas where a single product covers several cosmetic tasks. The company provides clinical and marketing materials after a contract; on the site they are not reproduced as independently verified, with no medical claims.

Manufacturing through certified partners

Finished products are made through certified Korean manufacturing partners; the company's package includes two manufacturer documents for CGMP/ISO standards (per company data). The company does not claim to have its own plant as a fact.

Registrations and standards

Per company data, part of the SKUs have an EU CPNP notification (the package includes three CPNP notifications; updated documents for individual items, including Multi-Solution Air Glow Cream and the reformulated serum, are expected by mid-August 2026), as well as US MoCRA listings. This is company data and registration references, not regulatory approval; copies of supporting documents are provided at the deal stage.
