Glow Pumpkin by FAU

A treatment-room formula in a home format

The consumer side of FAU: the Glow Pumpkin peel and booster drawn from the salon protocol, base makeup, SPF 50+ sun care and lip and lash care

About the company

Glow Pumpkin is the home continuation of what FAU makes for the treatment room. The company took its professional pumpkin protocol and rewrote it into a format a customer can handle alone.

Alongside it sits the base makeup: cushions, BB, a tone-up base and sun care. At FAU this is a separate block for retail and online, and it is bought not by a salon distributor but by a chain or a marketplace.

The manufacturer is the same — FAU CO., LTD., producing under cGMP as certified by the Korean regulator and under ISO 22716. In other words, a professional laboratory stands behind the consumer shelf, not a separate contractor.

FAU's professional lines — ten series for salons and clinics — sit on their own page. The separation is deliberate: a different buyer and a different conversation.

The consumer side of FAU CO., LTD., Hanam-si

Glow Pumpkin — the home version of the salon pumpkin protocol

SPF 50+ PA++++ sun care in three formats

Cushions and BB with a stated triple function

The company's intended channel is retail and online

Manufacturing under Korean-regulator cGMP and ISO 22716, stated by the company

Product lines

Glow Pumpkin

Two items, both built around an acid peel: a powder peel with seven per cent glycolic acid alongside AHA, BHA and PHA, and a foaming booster serum. The company presents the line as a professional protocol rewritten for home use.

Base makeup

Six items: BB in a tube and in a stick, three cushions and a tone-up base. Most of them carry a stated triple function — brightening, wrinkle care and sun protection.

Sun care

Three SPF 50+ PA++++ formats: a centella essence, a light serum and a cream. Different textures for different climates and skin types.

Lip and lash

A lip plumper and an eyelash serum.

Formulation, concentrations and testing

The 7.0 acid complex

In the Glow Pumpkin peel the company states glycolic acid alongside AHA, BHA and PHA. The powder form means the acids activate at the moment of use.

Triple function

For the cushions, the BB and the tone-up base the company states functional status on three counts at once: brightening, wrinkles and UV protection. In Korea that is a regulated category, and the status is evidenced by documents.

Protection levels

SPF 50+ PA++++ across the sun care group and SPF 37 PA++ on the base makeup — as the company marks them on the pack.

Shared manufacturing with the professional line

The consumer items are made by the same manufacturer as the salon range: FAU CO., LTD., with stated cGMP and ISO 22716.

Cushions and BB

Sun care in three textures

Lip plumper and lash serum

Terms of cooperation

Forms of cooperation

Wholesale supply of finished products. The company supplies this line for consumer channels only: retail, marketplaces and online platforms. It is not intended for professional B2B distribution, but the company confirmed on 9 September 2026 that it can be supplied to partners who also operate B2C sales channels.

Territory

Latin America is open. North America has partners without significant coverage.

Minimum order

Confirmed against a specific item list at the enquiry stage.

Price

The export price list is not published, by the company's decision. Terms travel through Teranova on a serious enquiry.

Documents

Functional status and the wording permitted in a given market are confirmed at the deal stage.

Working languages

English and Korean.

Prices and terms are indicative and are finalised at the deal stage through Teranova. Direct supplier contacts are not published: Teranova Group runs the negotiation, the checks and the delivery.
