aoi

One active, one purpose, concentrations shown openly

Korean skincare built on Korean-grown botanicals and high concentrations of actives: the Drop ampoule series on niacinamide, PDRN and hyaluronic acid

About the company

aoi is a Korean skincare brand. It is made by Red Purple Blue, a company based in Goyang-si, and the brand itself came to market in April 2026.

The brand starts from a question rather than from a range. No two people have the same skin, yet a ready-made set has already decided for the buyer what they need. So every aoi product is built around one concern and one key active, with its concentration printed on the bottle in both per cent and ppm.

The botanical raw material comes from Korean fields: rice, green tea and ginseng. To keep that supply stable the company signed a memorandum with an agricultural corporation in Cheorwon; it covers cultivation, sourcing, quality control, ingredient analysis and product development.

The company does not build on formulations proposed by contract manufacturers. It has its own certified research and development department, whose job is to turn research into patents and proprietary ingredients.

Red Purple Blue Co., Ltd; the aoi brand came to market in April 2026

Its own certified research and development department

Memorandum with an agricultural corporation in Cheorwon: cultivation, sourcing, quality control, ingredient analysis and product development

Nineteen pharmacy locations across Korea

Partnership with OFF BEAUTY, Korea's first beauty outlet

Certified as a women-owned business

Trademark applications filed in Australia, Europe and the United States

Skin irritation test results of 0.00 for all three products in the Drop series

Product lines

Drop Series

Three concentrated ampoules, each for its own concern. Lumi Drop works on tone and dark spots, Regen Drop on the skin barrier and renewal, Hydra Drop on soothing and holding moisture. They are not sold as a compulsory routine: the buyer takes the one that answers their concern and adds the others as needed. All three are stated to contain no artificial fragrance.

Formulation, concentrations and testing (1/2)

Niacinamide 5% and rice bran water

In Lumi Drop the company states niacinamide 5% (50,000 ppm), rice bran water 41% (411,600 ppm) and the rice ferment filtrate Riform-NPG 10% (100,000 ppm). The stated action is work on tone and dark spots.

PDRN and ginseng root water

In Regen Drop the company states Sodium DNA 1.5% (15,000 ppm) and ginseng root water 42% (421,400 ppm), together with its own NB-P Complex 1% (10,000 ppm) drawn from molokhia leaf, carrot, borage and yerba mate. The stated action is barrier support and skin renewal.

Hyaluronic acid and camellia sinensis water

In Hydra Drop the company states sodium hyaluronate 0.5% (5,008 ppm) and camellia sinensis water 45% (451,200 ppm), plus the Calmgreen complex 2% (20,000 ppm) from green tea leaf, apple mint leaf and thyme leaf. The stated action is soothing and moisture retention.

Skin irritation testing

For all three products in the Drop series the company supplied results from the Korea Institute of Dermatological Sciences: a twenty-four-hour closed patch test, November 2025, with a skin irritation index of 0.00 for each product.

Formulation, concentrations and testing (2/2)

Korean-grown material and in-house development

The company states that it looks not only at the ingredient itself but at where and how it is grown, and builds relationships with local farms. The memorandum with the agricultural corporation in Cheorwon covers the chain from field to finished product, and the formulations are developed in-house rather than by a contract manufacturer.

Product catalogue

Three concentrated ampoules in the Drop series: tone and pigmentation, barrier and renewal, hydration and soothing. Each carries one key active at a stated concentration. Price on request.

Niacinamide Lumi Drop

PDRN Regen Drop

Hyaluronic Hydra Drop

Export and markets

The brand launched in April 2026 and is now preparing to move beyond Korea. The company has signed a memorandum with an overseas export distributor, filed trademark applications in Australia, Europe and the United States, and is preparing for MoCRA and CPNP requirements. Plans for 2027 include Amazon in the United States and Qoo10 in Japan, along with Cosmoprof North America. Teranova works across Latin and North America and matches the brand to the markets and channels where formulation and concentrations are the first question asked: in Mexico, Brazil and Chile pharmacy retail remains a major channel, and stated percentages read directly there.

Testing

0,00

The 0.00 mark is the skin irritation index from testing by the Korea Institute of Dermatological Sciences on the three Drop products: a twenty-four-hour closed patch test, November 2025. Everything else is as stated by the company; documents are provided to the buyer on request.

Product formats

Concentrated ampoules in dropper bottles

Three products for three separate concerns: tone, barrier and hydration

The concentration of the key active printed on the bottle in per cent and in ppm

Formulations with no artificial fragrance

Terms of cooperation

Forms of cooperation

Wholesale supply of finished product under the aoi brand. The company is open to importers, distributors, pharmacy and retail chains and online channels.

Geography

The brand is preparing to move beyond Korea and has stated no priority country restrictions. The publication permission is non-exclusive: Teranova is not its agent or distributor.

Prices

Price on request. Whether the export price list is published is being agreed with the company; until that decision, prices are not shown on the page. Current terms reach the buyer through Teranova at the deal stage, stated separately from the cost of our services.

Minimum order

The minimum batch is confirmed against a specific list of items at the enquiry stage.

Documents

Skin irritation test results with an index of 0.00 exist for all three Drop products. The company also states its own certified development department and trademark applications filed in Australia, Europe and the United States. Copies are provided at the buyer's request.

How the work runs

Enquiry → checks and alignment by Teranova → negotiation and samples → logistics, customs and payment handled end to end.

Prices and terms are indicative and are finalised at the deal stage through Teranova. Direct supplier contacts are not published: Teranova Group runs the negotiation, the checks and the delivery.
