Helio PDRN

Natural-source PDRN (Sodium DNA) cosmetic raw material

Weiyi Biotech (为邑生物) — a manufacturer of natural-source PDRN raw material (Sodium DNA) for cosmetic formulation, offered in grades of 99% or higher with product documents, batch certificates of analysis and evaluation samples.

Supplier profile

About the company

Weiyi Biotech manufactures PDRN raw materials. Its natural-source PDRN is produced from male salmon testes through extraction, separation, purification and drying, and is identified in its cosmetic raw-material documentation as Sodium DNA. The company offers grades of 99% or higher, reports endotoxin below 0.01 EU/mg, and provides product documents, applicable batch certificates of analysis and evaluation samples.

Teranova presents Weiyi Biotech (为邑生物) to cosmetic brands, formulators and contract manufacturers. Product documents and evaluation samples are requested through Teranova; prices and commercial terms are shared on request and are not published.

- **No exclusive distributor — open to regional distributors through Teranova**

Product

Helio PDRN — Sodium DNA

Natural-source PDRN produced from male salmon testes through extraction, separation, purification and drying. A water-soluble powder offered in grades of 99% or higher, with the applicable batch certificate of analysis.

About the raw material (1/2)

From salmon testes to Sodium DNA

The company's natural-source PDRN is produced from male salmon testes through extraction, separation, purification and drying. In its cosmetic raw-material documentation the material is identified as Sodium DNA.

Purity grade and endotoxin

The company offers grades of 99% or higher. The assay method and calculation basis for the purity grade are those given in the applicable product documents and batch certificate of analysis. The company reports endotoxin below 0.01 EU/mg, which corresponds to below 0.01 EU/mL in a 1 mg/mL test solution.

Product comparison, in the manufacturer's words

Weiyi Biotech states that its quotation is the lowest for comparable PDRN grades of 99% or higher and that its endotoxin level is the lowest in the industry, with a reported result below 0.01 EU/mg. Specific quotations are not published.

About the raw material (2/2)

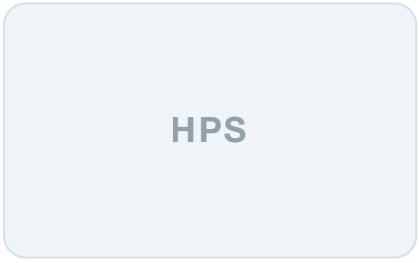

Specification summary

According to the company's Technical Data Sheet: white, white-like or light yellow powder, soluble in water; pH 5.0–9.0 in a 1% aqueous solution; limits for lead, cadmium, arsenic and mercury, total aerobic count, yeast and mould, and pathogen absence (thermotolerant coliforms, Staphylococcus aureus, Pseudomonas aeruginosa). Recommended use level 0.01–2.0%; shelf life 24 months. Batch values are given in the applicable certificate of analysis.
